I. Introduction and Purpose

Residents from the community of Timberon joined together to update the 2002 Community Action Plan by determining current community concerns and priorities. The community will use this plan for implementing actions for improvements to Timberon. The committee believes the plan will provide guidance for residents to maintain the viability of Timberon as a community.

The Community Action Team (CAT) plans to use multiple programs as sources of technical help to implement this plan. Four principal sources of assistance will be the Forest Service program, the USDA Resource Conservation and Development program administered by the South Central Mountain RC&D Council, the EPA and HUD Community Development Block Grants for colonias.

The volunteers for the CAT are: Chairman Rick Merrick, Gwen Adams, Lillian Devine, Linda Lea, Donna Millar and Judy Underwood.

II. Timberon Development Council

Website: <http://www.timberon.org/>

TDC Mission Statement: To identify the Timberon community's needs, develop possible solutions, and help facilitate the implementation of those solutions by securing multiple sources of support.

The Timberon Development Council (TDC), a 501(c)3 non-profit organization, was formed to give Timberon property owners on and off the mountain an opportunity to express their opinions and plans for the good of Timberon.

Today the TDC is involved with community planning and applications for grant money on state and federal levels to improve Timberon and neighboring areas of the Lincoln National Forest. Encouraging cooperation within Timberon and with the relevant state and federal agencies are goals of the TDC. The TDC officers elected in October, 2008 are: President, Everett E. Putney; Vice President, Rick Merrick; Secretary, Jackie Fioretti, and Treasurer, Fran Trendler.

We have great community support and good attendance at the meetings, which is most gratifying. Over the years, the members of the TDC have accomplished a long list of projects, events and grant administration programs. (See Appendix A.)

III. Description of Local Conditions

A. The Border Colonias Region

The U.S.-Mexico border is dotted by hundreds of rural, unincorporated, subdivisions that are home to approximately 1.5 million people. These communities, known as colonias, are characterized by substandard housing, dirt roads, lack of access to potable drinking water and inadequate sewage disposal and drainage systems. These living conditions are exacerbated by the related problems of poor education and health services, limited job opportunities and high unemployment rates. Colonia communities are often concentrated pockets of poverty, physically and jurisdictionally isolated from neighboring cities. Efforts to address the problems in these communities have faced significant additional barriers, including insufficient resources, the absence of consensus on appropriate development approaches, and widespread neglect by government and related entities.

B. History, Culture and Demographics

Judge Paul Moss of Odessa, Texas purchased the property of Timberon from the U.S. Department of the Interior in 1933. Following the demise of Judge Moss, Willie Farah of El Paso purchased the land and built the first airstrip. In March of 1969, the land was sold by Farah to a group of businessmen headed by Johnny Mobley, who formed the corporation known as North American Land Developments (NALD). Johnny Mobley chose the development name of "Timberon" during an informal business discussion in July, 1969. The company deeded property for parks to the former Timberon Property Owners Association (TPOA), as well as property for the church and school.

J.I. (Joe) Feters organized the Timberon Volunteer Fire Department in October, 1974. The State of New Mexico certified the department effective January 1, 1976. Since Timberon's creation, there have been two fires at Timberon larger than 100 acres. The first occurred in April 1975 (225 acres), and the second (125 acres) occurred in February 1977. The Emergency Medical Service was formed within the fire department on February 20, 1982.

Postal service for Timberon began in December, 1974. The Dell Telephone Cooperative of Dell City, Texas installed regular telephone lines throughout Timberon in the fall of 1981.

The paved road between Sunspot and Timberon was completed in 2005 by Otero County.

The current year-round population is 252. Although there are no counts to identify the number of vacationers and persons living in Timberon seasonally, local unofficial counts indicate that the average part-time population is about equal to the permanent population. Factors such as the paved road into Timberon, completed in 2005, and changing state and national economic conditions will have a pronounced effect making any long-term projection of population counts difficult. (See Appendix B.)

Timberon residents believe that population growth projections for New Mexico will also apply to Timberon. These include:

- New Mexico is growing faster than the national average.
- The population will continue to age as the number of people in the baby-boom generation reach retirement age.
- A large percentage of the residents in Timberon are retirees and we expect this trend to continue.

Timberon has the potential to become a summer retreat, holiday resort, artist colony and viable retirement community.

C. Location and Climate

Timberon is located in the Sacramento Mountains of New Mexico between Alamogordo and Carlsbad. Timberon is bounded to the west, north and east by the Lincoln National Forest. This environment attracts many vacationers, summer campers and other visitors to Timberon. Timberon is located within a three-hour drive of El Paso, Texas; Las Cruces, New Mexico; and Juarez, Mexico. (See Appendix C & D.)

Elevations in Timberon range from 6,700 to 7,600 feet above sea level. Temperatures range from average overnight lows of 30° F during the winter to average daily highs reaching 75° F in the summer. The area receives annual precipitation of about 24 inches, including six inches of snowfall. The current land area of Timberon is 14.6 square miles (9,350 acres)

D. Public Facilities and Services

Timberon offers a Community Center, a volunteer fire department providing fire and ambulance services, a library, an airstrip and a nine-hole golf course. There is town water, road maintenance and trash removal. Children are bused to school in Cloudcroft, 30 miles away. There is one fishing pond, five parks, one church and an adjacent cemetery. The nearest healthcare is 30 miles away in Cloudcroft. It is anticipated that the public swimming pool will reopen summer, 2009. A Senior Van takes senior residents only to Alamogordo one day a week.

E. Community Infrastructure

The community of Timberon is fortunate to have some community resources available to serve residents of the community.

F. Forestry Resources

Timberon is one of 532 communities in New Mexico vulnerable and at risk to catastrophic wildfire. The community has actively participated in the cost share forest thinning program administered by the New Mexico State Forestry Division since 2001 and desires to expand its efforts. The TDC administered this program from 2003-2008.

The CAT recognizes the need to continue to implement a program to create a fire-safe community. This terminology refers to an extensive forest-thinning program that treats a significant amount of the land area within the boundaries of Timberon. This treatment will significantly reduce the potential catastrophic fire danger to Timberon.

The opportunity to work in collaborative efforts with the BLM, the USDA Forest Service, the US Military, the NM State Land Office, and private landowners to create a firesafe perimeter for Timberon is underway. Each of these agencies has planning responsibility for lands adjoining the boundary of Timberon. A fire-safe perimeter for the south, southwest, west and northwest side of Timberon has been accomplished since the 2002 CAP. The BLM thinned 2626 acres at an average cost of \$240.90 per acre. The cost has been shared approximately equally between the BLM and the military. The BLM spent \$238,640.10 and the military has spent \$237,910.78.

Timberon needs a maintenance plan that will allow the considerable investment of energy and money to continue to provide fire suppression benefits to Timberon.

A need exists to find a market for the small diameter trees removed during forest management efforts. New markets for wood resources removed from Timberon are of vital interest to this community.

G. Water Resources

There are 7,920 total lots in Timberon with 5,800 owners. At the present time the water system delivers water to 490 metered customers which is 6% of the total lots in Timberon. Infrastructure is installed to provide water to 6,212 lots currently on standby status, leaving 1,218 lots available for future water connections. The Timberon Water and Sanitation District (TWSD) administers water for Timberon. The jurisdiction of the district operations includes water production and distribution, roads, recreational facilities (golf course, fishing lakes, swimming pool, and parks) and administrative functions thereof.

TWSD has a 40-year plan which it is currently updating.

IV. Timberon Community Action Plan Process

In May, 2008 the TDC determined the need to review and update the 2002 Timberon Community Action Plan (CAP). The Community Action Team (CAT) formed for this purpose.

The planning process for the 2009 CAP involved public input from Timberon property owners. The CAT created a survey available on the internet and distributed in hard-copy form. The TDC sponsored a community meeting to gather information.

The survey received a gratifying response from 52 citizens, more than 20% of our year-round population. The survey asked respondents to rank, in priority order, the need for improvement of existing facilities and services and the addition of new ones. (See Appendix E.)

The survey also included content to elicit narrative feedback from respondents with the following questions:

- 1. Tell us your thoughts on the ideas above or new ideas of your own:*
- 2. Which of the above ideas are you willing to help bring about, through volunteering or donating materials, services or funds?*
- 3. In what ways is Timberon succeeding as a community?*

The community survey generated a list of the primary concerns of the community which fell into these five categories: Fire Mitigation and Forest Management, Communication, Recreation and Parks, Commercial Services and Green Efforts.

The more than 100 narrative responses received were incorporated into the discussion at the community meeting on March 14, 2009, to help the focus groups explore conditions and options. Again, the turnout of nearly 50 individuals gave an authentic representation of the community's needs and willingness to participate in improvement.

The community meeting provided a forum for these five focus groups, plus a table for "Other" if citizens had any concerns not addressed in the five focus groups.

The survey results and the community meeting guided the CAT in prioritizing the projects and actions to help Timberon realize community supported development.

V. Timberon Community Goals and Objectives

Fire Mitigation and Forest Management

Reduce heavy fuel loads in Timberon
Sign fire evacuation route
Install more emergency sirens and tests
Offer fire-wise classes
Seek investors or grants for local wood pellet industry, or some other industry that will use the small diameter timber

Commercial Services

Encourage medical clinic
Encourage restaurant/food, especially breakfast
Provide training and business development
Promote airstrip (as commercial service rather than recreation)
Form artists league
Encourage hardware store

Green Efforts

Promote recycling
Promote solar and wind power
Establish community vegetable garden and farmer's market
Encourage water conservation
Provide classes on these topics

Communication

Provide cell phone service
Provide community internet access point
Install reverse 911

Recreation and Parks

Promote golf course
Re-establish fishing lakes
Promote tranquility and serenity to attract artists & retirees
Clean up around the tennis courts and Main Street
Support chili cook-off
Encourage links to Timberon websites on other local websites
Encourage more community activities at the lodge.
Display map of hiking trails on web site and in lodge information.
Encourage park activities: Frisbee golf, add water, promote day trips

Other

Improve appearance of Main Street
Encourage lodge activities, including use of the outdoor pavilion
Develop a visitor center
Establish a firing range

VI. Potential Funding Sources of Grants and Technical Assistance to Implement the Timberon Community Action Plan

The Community Action Team presents the following list of agencies, organizations, and ideas as potential funding sources or as technical assistance sources to implement the planned decisions. This list is not limited to the present contacts and it is recommended the Community Implementation Team continue to develop the list and networks. Development of essential contacts for Timberon will provide a method of improved community cooperation for local leaders and will show community unity.

1. USDA Contact Agencies including:
 - a. USDA Forest Service
 1. Rural Community Assistance Program
 2. Collaborative Forest Restoration Program
 3. Natural Resources Conservation Service: Resource Conservation and Development Program and Council for Financial and technical assistance
 - b. NM Rural Development Agency for financial and technical assistance
2. New Mexico Resources
 - a. NM Economic Development for advertising programs, business development, entrepreneurial programs, marketing assistance
 - b. NM Department of Agriculture for Otero Soil and Water District program, conservation technical assistance, and link to the NM Association of Conservation Districts
 - c. NM Department of Labor for Job Training Partnership Act and other potential labor related assistance
 - d. Members of the NM Legislature for program development and support: Legislative Council Service for bill development assistance and tracking process during legislative sessions.
 - e. Small business development centers for assistance with business plans and potential funding sources
 - f. NM Rural Economic Development for tourism related activities both local and state.
 - g. New Mexico Energy & Minerals Department link to NM Division of State Forestry for forest related assistance on state and private land resources.
 - h. Specific commissions in New Mexico such as NM Interstate Stream Commission for statewide water planning information.
 - i. NM Finance and Administration Department - potential grants for public projects.
 - j. New Mexico Environment Department.
3. Federal Agencies
 - a. Bureau of Land Management for continued network for fire prevention in Timberon
 - b. US Military for continued fire prevention and projects related to common interest with Timberon.
 - c. Commission on Aging for senior citizen program involvement such as SCORE.
 - d. Funding for Colonias: Grant programs administered by the NM Environment Department - USDA Colonias funding.
4. Private and Public networks
 - National Foundation of Forest Practitioners
 - Private companies having corporate giving opportunities related to Timberon goals
 - Historic preservation groups and foundations
5. Otero County Commission: develop strong working relationship with present and future commission membership for common interest in Otero County.
6. Conference network with value to Timberon such as small wood conference, NM Water Conference and NM Association of RC&D Councils, and other specific workshops that will benefit Timberon.

VII. Identification of Training Needs and Education for Plan Implementation

The Timberon Action Team discussed various requirements to implement the plan and the highest priority items are presented below.

Facilitation training is needed for a local person to serve as a community facilitator. The facilitator will also need training in grant preparation and administration. The facilitator will need to have good program coordination skills to involve multiple aspects of community projects with agencies and organizations.

Learning the program for job training programs and administration of the same is also needed to make effective use of the program in Timberon.

Educational efforts to explain the proper steps for business plan development, conducting market surveys, and local promotion of Timberon is a recognized need for Timberon.

Education of the local people and new residents of Timberon regarding the latest evacuation routes for Timberon and dissemination of information about emergency plans for the community were identified as high priority by the local fire department. The fire department staff realizes plans are in place but may not be used often enough to measure the response of residents to the first alert signals of an emergency.

Local residents need to understand the basic operation of the water system of Timberon to appreciate the need for long-term water system improvements. Common understanding of the basic operation of the water system will assist the TWSD leaders to provide unity of purpose for budgets and technical needs to improve the system. Technical help from outside consultants working in cooperation with the board of TWSD is the recognized process to provide this understanding.

The Community Action Team will utilize the learning process gained from experience of outside professionals combined with local desire to improve the community to identify additional educational needs and training as the plan is implemented.

VIII. Plan Monitoring and Updates

The Community Action Team will record completion of work items in the plan. After each activity is finished the team will have the opportunity to evaluate the project against its intended goal. This process will allow improvement of operations for the Community Action Team. The team will also invite input from residents to help monitor the success of the plan. Replication of the initial planning process performed by local people will provide planning updates on a continued basis; therefore, keeping the plan current. The development of Annual Plans of Work will also provide a measure of planning success and monitoring the application of recorded actions.

Timberon 2009 Community Action Plan Approvals

The Timberon Development Council, Inc. original 2002 Community Action Plan was approved and signed by the Community Action Team, the USDA Forest Service, the South Central Mountain RC&D, the Timberon Water and Sanitation District and the Timberon Fire Department on March 9, 2002. The update to the Community action Plan was completed in June, 2009 and was submitted to the original agencies for collaboration and approval of the plan in July 2009.

This Community Action Plan for Timberon was approved this 13th day of June, 2009 as witnessed by the Chairman of the Timberon Community Action Plan Team.

 Rick Merrick Chairman	<u>2-20-10</u> Date
I concur that this plan developed by the Timberon Community Action Plan Team meets the guidelines for the Rural Community Assistance Program administered by the authority of the USDA Forest Service.	
 Bonnie Owens District Ranger, Grandditch Ranger District	<u>3-4-10</u> Date
The South Central Mountain Resource Conservation & Development Council supports the Timberon Community Action Plan based on input from residents of Timberon and the goals set forth for the future.	
 Everett Putney, Acting Chairman South Central Mountain RCMD	<u>3-13-2010</u> Date
The Timberon Water and Sanitation District endorses this plan, supports and collaborates with the Timberon Development Council, Inc.	
 Arden Schug, Chairman Timberon Water and Sanitation District	<u>2-20-10</u> Date
The Timberon Fire Department endorses this plan and supports the Timberon Development Council, Inc.	
 Joe Wheeler, Fire Chief Timberon Volunteer Fire Department	<u>2-20-10</u> Date
The Otero County Commissioners support this plan.	
 Ronny Rardin Chairman, Otero County Commissioners	<u>3/6/10</u> Date

The Timberon Development Council hereby adopts this 2009 Timberon Community Action Plan and agrees to use all available assistance to realize the goals, objectives, and action items outlined herein.

APPENDIX A: TDC Accomplishments

Ongoing

- Developing 2009 Community Action Plan
- Maintain weather station
- Maintain TDC website
- Sponsor July 4th Celebration
- Support Timberon Youth Boosters
- Promote tree thinning program

2008

- Operated TDC website and weather station
- Facilitated airstrip paving
- Developed Mary Glover Park
- Donated toward community swimming pool improvements
- Donated to VFW for scholarship programs

2007

- Launched TDC website
- Installed weather station
- Supported *Operation Uplink* which gives calling cards to servicemen
- Supplied paper for the Timberon Extension Club *Welcome Wagon*
- Obtained grant funding for tree thinning of Mary Glover, Shallow Creek and Tres Marias Parks

2006

- Sponsored community meeting to discuss tax reduction impacts
- Built and placed community bulletin board at post office
- Placed signs at dry lake to help control dumping of slash
- Applied for and managed tree thinning grants

2005

- Donated money to TVFD for breathing machine
- Donated signs for golf course, denoting hole numbers, par and yardage
- Provided drapes for the lodge annex
- Sponsored local youth to forestry camp in Cuba, NM

2002

- Sponsored 2002 Community Action Plan

XI. APPENDIX B: Census Data

1990 Census, population of New Mexico: 1,515,069
 2000 Census, population of New Mexico: 1,819,046
 2006 Projection, population of New Mexico: 1,954,599
 Source: U.S. Census Bureau

Projected Population New Mexico Counties July 1, 2005 to July 1, 2035
